RE: Permit No. M-1981-043, North of Douglas Pass, Inspection Problem-Corrective Action Extension Request Approval-2

Dear Mr. Klaetsch:

On October 24, 2023 the Colorado Division of Reclamation Mining and Safety (Division) inspected the above mentioned pit. Signs and Markers was cited as an inspection problem. Corrective actions required you to conduct a survey and replace boundary markers. As well as notify the Division if any off-site impacts were observed. This information was originally due on January 8, 2024. On May 20, 2024 the Division received a second extension request to allow the Operator more time to conduct field activities due to staff being tied up at other high priority sites. Your extension request is approved. Required corrective action documentation is due by July 1, 2024.

If you require additional information, or have questions or concerns, please feel free to contact me.

Sincerely,

Amy Yeldell
Environmental Protection Specialist
