To: Graham Roberts <graham.roberts@trappermine.com>, Robin Reilley - DNR <robin.reilley@state.co.us>

Good Morning Graham,

Please find DRMS's review of the 2024 April DMRs for Trapper Mine. The Division has no concerns.

Thank you

Re: Trapper Mine (Permit No. C1981-010)
Review of DMR's 2024 April

Dear Mr. Roberts:

The Division has received and reviewed the April 2024 monthly Discharge Monitoring Reports (DMRs), including the acute WET testing results for the Trapper Mine. The DMRs were received electronically by the Division on 17 May 2024. Thank you for your timely submittal of this information. Trapper submits DMRs to the Division, in accordance with Rule 4.05.13(2)(a)(iii).

Trapper reported the following outfalls discharged in April.

- Johnson System Pond #10, NPDS 001
- No Name Pond #5 NPDES 002
- East Pyeatt #2
- Middle Flume #20
- East Middle Flume #21

Trapper reported that none of the outfalls requiring acute monthly WET testing discharged. Monthly DMRs for discharging outfalls indicated that no parameters were exceeded.

The Division does not have any questions, concerns, or further comments at this time. If you have any questions or need additional information, please contact me.

Sincerely,

Robin Reilley, M.S. GISP
Environmental Protection Specialist II
