**RE: Rifle Gravel Pit #1, Permit M-2021-052, Incomplete Application for Transfer of Mineral Permit and Succession of Operators, Revision SO-1 #3**

Dear Mr. Carpenter:

On April 8, 2024 the Division of Reclamation, Mining and Safety received the Application Form for Transfer of Mineral Permit and Succession of Operators from IHC Scott, Inc. to W.W. Clyde & Co., for the Rifle Gravel Pit #1, Permit M-2021-052. Additional material was received on May 24, 2024. The following items remain incomplete for the application to be processed:

Application Form

1. The notary on pages 9 is incorrect. The current permittee is IHC Scott, Inc. Only the prospective successor notary should list Clyde as the company name.

Structure Agreement

2. Provided was the original engineering evaluation for structures from the permit application. Within the evaluation URSA is listed as the owner of two structures. Have both of these features been sold. If not provide notification for URSA.
3. Mailing cards were provided for Terra Energy and CDOT. Documentation of what was sent was not provided. Please provide the Structure agreements with all features listed out that were mailed to the various owners.

All bonding requirements have been met. Please note that that the current bond expires 7/1/2024. The transfer must be completed prior to the bond termination in order for the Division to accept the replacement financial warranty.

Please return the required documentation to the Division **before June 8, 2024**. All completed permit documents are required to be submitted for consideration of your Request for Transfer of Mineral Permit and Succession of Operators Application. An incomplete application may be

denied after the 60 day submittal request, if requested documents or information are not received. In the event of any delay in your submittal or if you have any questions, please contact the Division.

Sincerely,

**Amy Yeldell**  
Environmental Protection Specialist
