Re: Preliminary Adequacy Review, Technical Revision No. 4 (TR-4) – Update of the Approved Groundwater Monitoring Plan, Riverview Resource, Permit No. M-1999-098

Dear Mr. Whitmer:

On May 31, 2024, the Division of Reclamation, Mining and Safety (Division/DRMS) received your request for Technical Revision No. 4 (TR-4) to update the groundwater monitoring plan for the Riverview Resource, Permit No. M-1999-098. The following clarifications or items need to be addressed to the Division's satisfaction.

1. The Operator provided a map indicating the wells that will plugged and abandoned. Please provide a map that shows the locations of the monitoring well network after those wells are removed from service and MW-3 is replaced.
2. Please commit to providing copies of appropriate DWR forms documenting the monitoring wells are plugged and abandoned according to State Regulations.
3. Please affirmatively acknowledge that site water level data will continue to be submitted annually with the annual report, map, and fee.

The decision date for your application is set for **June 30, 2024**. If additional time is needed to respond, an extension request must be received by our Office by the decision date. If on the decision date, outstanding adequacy items remain, and no extension request has been received, your revision may be denied and the file terminated. patrick.lennberg@state.co.us.

Sincerely,

Patrick Lennberg

Environmental Protection Specialist
