RE: File No. M-2008-017 Derr Pit – Summary for May Water Level Reporting

Dear Ms. Gagnon,

We are submitting this letter and summary for the May Water Level Reporting on behalf of W.W. Clyde & Co.

We are providing this summary letter to discuss and provide information in regard to the May off-site an on-site monitor wells and provide the dewatering volumes pumped for April.

During the month of April a total of 0.0 acre-feet was pumped and discharged into the on-site recharge ponds within the Derr Pit.

AgPro was able to get all the normal monthly readings/measurements on all of the off-site wells for the April readings. The on-site monitor wells saw increases and decreases in the elevation of the water levels. The water level elevations in the monitor wells on the Phase 1-4 portion of the pit went up on the south side by 1.14 feet and up by 0.02 feet on the north side. The water level elevations in the monitor wells on the upper terrace of the permit area increased by 0.64 feet for MW-14, increased by 2.06 feet for MW-15, increased by 0.48 feet for MW-16, decreased 0.01 feet for MW-17, and decreased by 0.04 feet for MW-18.

Please let us know if you have any questions or concerns.

Sincerely,

J.C. York, P.E.

Notes:

- 1) Graph displays Depth to Groundwater (lower depth to groundwater reading means higher water table elevation).
- 2) Trigger point is described in Settlement Agreement.
- 3) Since Historical Data was not established until September 2020, a year-to-date running average was used to compute historical average. As of September 2020, the historical average is computed as described in Settlement Agreement.
