RE: Permit No. M-1999-098 – Riverview Resource
Groundwater Monitoring Plan Revision – Adequacy Review Response

Holcim requested on May 31, 2024 to amend Exhibit G (Water Information) to remove monitoring wells 7, 8, 9, 10, and 11 from further groundwater well monitoring and reporting. PDC Energy built a natural gas fracking pad in 2018 (attached map) and mining the aggregate material will not occur on this parcel. Monitoring well 3 will be replaced.

To address the preliminary adequacy review, please find the responses:

- 1.) Attached revised groundwater monitoring well plan map after closure of wells 7, 8, 9, 10, and 11.
- 2.) Holcim commits to providing the appropriate DWR-09 Form Well Abandonment Report.
- 3.) Holcim commits to continually provide the Division water level data with the annual report.

If you have any questions, please feel free to contact me at 702-379-4623.

Sincerely,

A handwritten signature in black ink, appearing to read 'Wyatt R. Webster', written over a horizontal line.
