Patrick, the pictures that were presented to you in the Response #2 to notify the public about the pending Kirtright work and decisions, fall short of the intended purpose.

The first attached picture is a joke. This picture was taken from Lacy Lane. The neighbors to the south have to walk across a field to get to it, because the type is so small no one can read it without binoculars. I'll bet no one sees the sign from the neighborhood, or secondly walks through the tall grass to read it.

The second is taken from Lacy Lane looking north, but again neighbors need to either use magnification to read it or trespass across Randy Kirtright's land to see it.

I am not attaching the third sign that can be seen from Randy's driveway, only if you are looking for it. You have to be pretty close to read the small type. It is a duplicate of the second sign.

BTW, the directions from DRMS are to have another sign along Frontage Road, and I've looked for it several times, and believe it is not there. It also is not called out on the Response map that was submitted.

Coulsons really don't want the public to know what is happening, and while partially complying, they have shown a disrespect for the purpose of the DRMS request.
