**Re: Amen Aggregate Resource, Permit No. M2019025
2023 Annual Groundwater Monitoring Data Acceptance**

Dear Ms. Kauffman,

On June 28, 2024, the Division of Reclamation, Mining and Safety (Division/DRMS) received the monthly groundwater elevation data submitted by Coulson Excavating.

Per Technical Revision 1, the Operator is required to sample monitoring wells 1-5 and submit the data with the annual report for 2023. Wells 1-5 correlate to mining cells 2, 2, 4, and 6. Additionally, the Operator will continue sampling and submit a Background Water Quality and Water Level Monitoring Summary Report by the end of the 2024 calendar year which will include monthly water level and quarterly water quality data for all monitoring wells 1-10.

The Division reviewed and accepts the groundwater level data submitted on 6/28/2024.

If you have any questions, please contact me at nikie.gagnon@state.co.us or (303) 866-3567 Ext. 8126.

Sincerely,

Nikie Gagnon
Environmental Protection Specialist
