Good morning Amber,

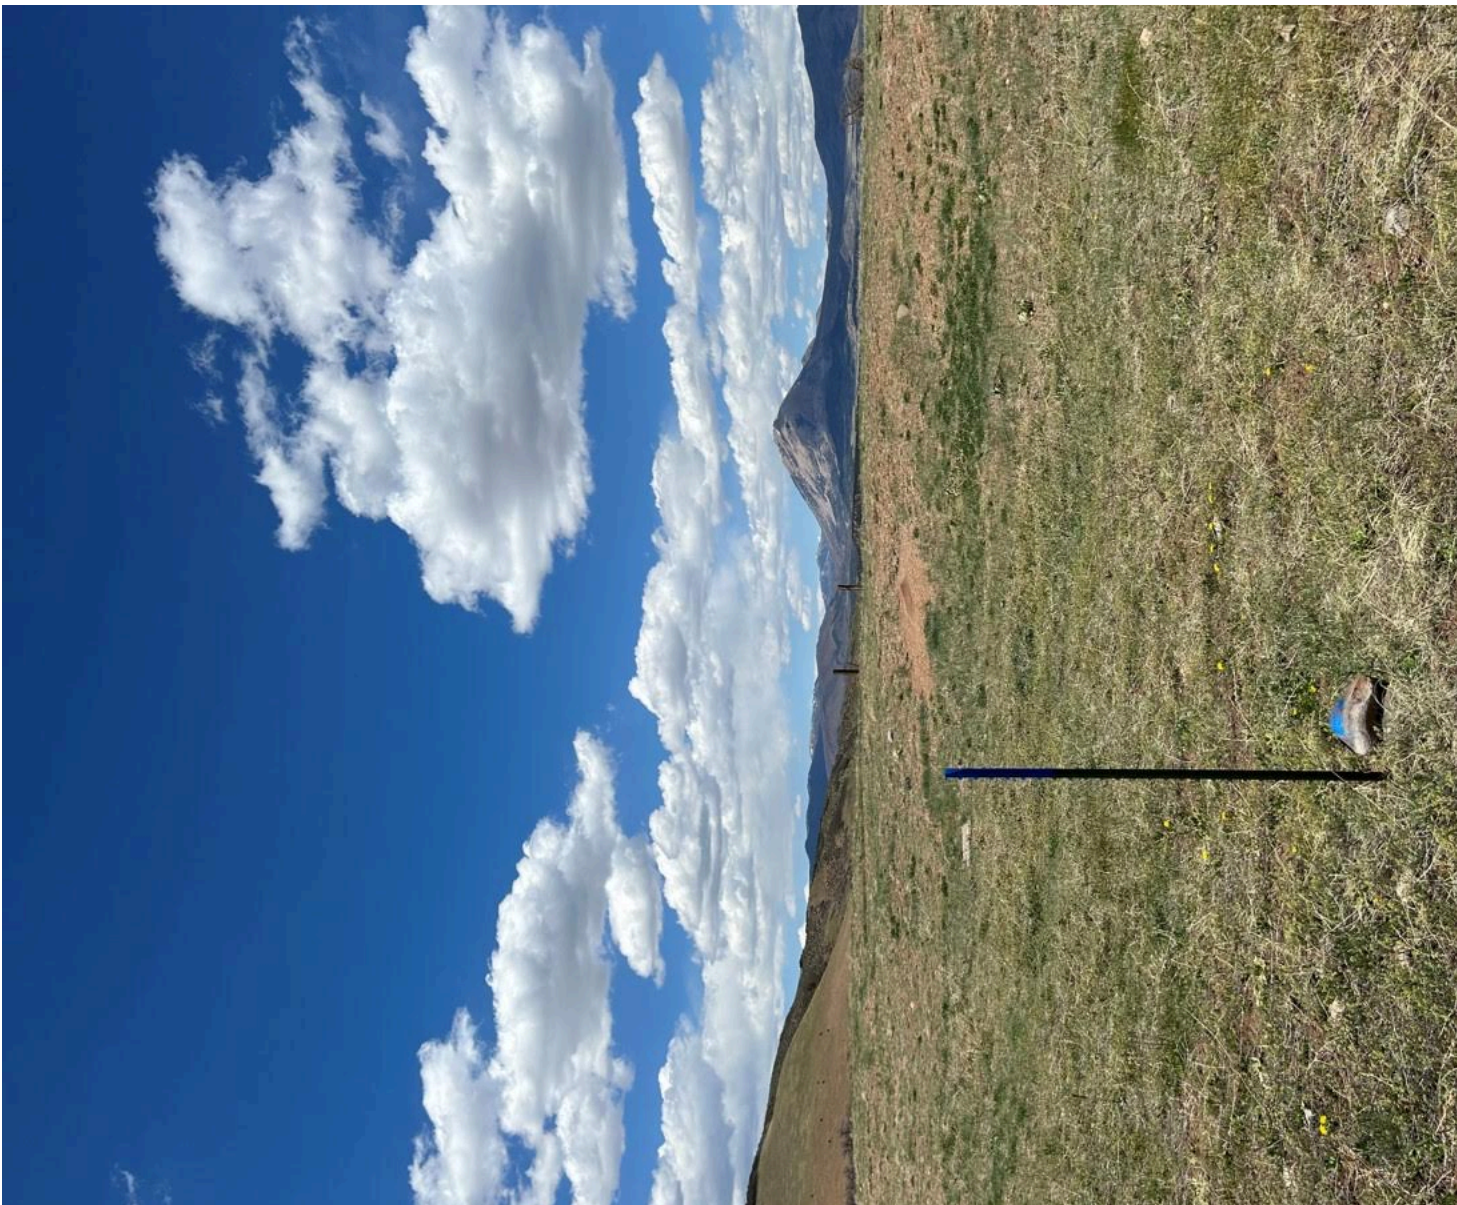

I just wanted to update you on the Rocky Flat Gravel Pit. Since we last talked I still have not made contact with the county about a weed mitigation plan. The gravel pit has been grazed by the inches. We are in a drought and the cattle even ate the weeds. There is no standing water in the pit. I will attach photos of the markers and the gravel pit after grazing taken at 9:13 am on July. We be moving the cows of the gravel pit in the next week or so. The mitigation of the weeds will have to wait until the vegetation grows back in a few months. Please call me at 720-209-3838 if w anything else or if we need to file anymore extensions. Thank you Lukas Dearmin

Good morning,

Thanks for sending this my way. I will mark that the boundaries have been marked and consider that portion of the inspection problems **abated**. Because it will be a few months for the weeds to be addressed, please request an extension and provide a time frame for which you think that problem can be addressed.

Thank you,
