Hi Leigh –

Please see the email string. CDPHE has considered Spill@2021-0223 complete at the Vagneur Pit M-1980085.

Thank you.

Jim

Jim -

Thank you very much for the additional information. Based on this information, the Division considered the cleanup completed and will not take further action on the site. Please note that this action is for this incident only and does not apply to any other incidents, future or past, which may have taken place at the site. You should continue to remain in compliance with Colorado's solid waste statutes (30-20-100 *et seq.*, C.R.S.) and regulations (6 CCR 1007-2). If you have any questions, please contact me at (303) 692-3347 or by e-mail at caren.johannes@state.co.us.

Hi Caren –

In regards to Spill #2021-0223 we completed processing the material through our Asphalt Hot Mix Plant permit #09PI1168 AIRS ID 097-0002-003 today. The material is now part of our Recycled Asphalt Product (RAP) to be used for future paving projects. It's our hope that the Division can now close out Spill #2021-0223.

Thank you & best regards.

Jim

Hi, Jim-

In order for me to finalize the report approval, the soil needs to be processed. Please let me know when this has been completed. I can close out the spill at that time. If you have additional questions or concerns, please let me know,

Hi Caren –

We have not run it through the Hot Mix Asphalt plant (HMA). We thought it best to have the Division review the lab analysis prior to doing just that. If the Division is satisfied with the lab results I will schedule it to be processed through the HMA plant.

Thank you.

Jim

Jim -

Thank you for the report.

I noted in the report that the soil has been moved to the new site for use. Has this soil been used for asphaltic mix yet as required under the initial approval?
