Re: Tucson South Resource, Permit No. M2004044
2023 Annual Groundwater Monitoring Data Acceptance

Dear Mr. Wyatt,

On January 3, 2024, the Division of Reclamation, Mining and Safety (Division) received a graph of monthly groundwater elevation data for the monitoring wells around the Tucson South Resource site. Additionally, on July 2, 2024, the Division requested and received the associated data table of monthly groundwater elevations for the period of February 2023 to April 2024.

Per the approved Groundwater Monitoring and Mitigation Plan, the Operator is required to sample the water levels on a monthly basis for the life of the mine and submit a graph and data table to the Division with the annual report.

The Division reviewed and accepts the groundwater data submitted with the 2023 annual report.

If you have any questions, please contact me at nikie.gagnon@state.co.us or (303) 866-3567 Ext. 8126.

Sincerely,

Nikie Gagnon
Environmental Protection Specialist
