

Notes:

Please refer to the 2023-24 Annual Report Map for the location of the areas discussed below.

The following list outlined the various areas of disturbance at the mine

Description	Acres
Topsoil Piles 8,500 cyd	0.5 (brown)
Stripped area	2.0 (orange)
Plant site	8.8 XXX (Cross hatched)
Lake area	8.2 (blue)
Pre-law undisturbed	0.8 (green)

The backfilled area covers Pr-law areas in and around Plant Site. It will be reclaimed when mining ends.

10. Approximately 1.3 acres of new lake area was created this year that needs no reclamation. The 8.2 acres was measured using an drone photo and the total lake area on the map decreased from last years estimate because the photo is accurate then the method used previously.

No reclamation is called for at this time

18. The bond was evaluated in August 16, 2017 and covers 16 acres of reclamation. There are approximately 11.3 above water acres that would need reclaiming at this time. The \$45,124.07 is adequate to cover the reclamation cost.
