SENT VIA ELECTRONIC COMMUNICATION

July 10, 2024

Mr. Patrick Lennberg
Environmental Protection Specialist
Colorado Department of Natural Resources
Division of Reclamation, Mining and Safety
Office of Mined Land Reclamation
1313 Sherman Street, Room 215
Denver, Colorado 80203

RE: Additional Information Required No. 2, Grassy Valley Groundwater and Surface Water Monitoring Report April 2024; Permit No. M-1980-244

Dear Mr. Lennberg:

Cripple Creek and Victor Gold Mining Company (CC&V) received the Division of Reclamation, Mining, and Safety's (DRMS) *Additional Information Required No. 2, Grassy Valley Groundwater and Surface Water Monitoring Report April 2024; Permit No. M-1980-244*. CC&V has reviewed the additional information required in the letter dated June 27, 2024, from DRMS and has prepared the following responses for each comment. The DRMS comment (**in bold**) and CC&V's corresponding response (*in italics*) is presented below.

- 1. The historic surface water data provided in Attachment 3 does not contain any data from GV-03. The original question did not specifically call out the three locations of interest; GV-02, GV-03 and GV-06. Please provide data related to GV-03.**

Additionally, the data provided is in a format that is hard to understand as there are multiple groups of values that appear to be reporting limits and concentrations but there is no column header that clearly states what the value relates to. Please provide an updated data table in PDF and Excel formats that also include data for GV-03.

Cripple Creek & Victor

F 719.689.3254
newmont.com

Historic water quality data from the GV-02, GV-03, and GV-06 location are provided in the PDF version as Attachment 1. Excel version of the data file is attached with the submission of this letter.

- 2. The Operator states CC&V does not own the mineral rights to the downstream property where historic surface water sampling locations GV-4.5 and GV-05 are located. A review of the Teller County Assessor's website indicates CC&V does own the mineral rights, see Attachment. The parcel in question is the Nichego Placer, account no. R0001089, and CC&V owns the severed mineral rights for the Nichego Placer, account no. N0024685. Please provide a response.**

The Division is concerned that the continued discharge of ARD from the ECOSA to the shallow groundwater system is migrating down Grassy Valley through undefined pathways and has the potential to enter the surface water system near or below GV-06. As GV-06 freezes during the winter months and cannot be monitored, having additional sampling locations downgradient will allow CC&V the opportunity to monitor surface water conditions for more of the year. Locations GV-4.5 and GV-05, as depicted on previous permit maps, being located downgradient will freeze later and flow earlier in the year compared to GV-06. Also, the additional locations will aid in determining how groundwater and surface water interact within Grassy Valley.

After a further review of the parcel data, CC&V owns fifty percent (50%) of the mineral interest on the parcel in question. As per common law, we confirm that we have the right to access the property. We will commit to collecting samples from the GV-4.5 and GV-05 locations in July of 2024 and will continue to monitor these locations monthly until baseline water quality can be established and an appropriate sampling frequency can be determined.

We trust that the information provided above addresses the additional information required by DRMS. Should the Division require further information regarding the above responses, please do not hesitate to contact Josh Adams at 719-323-0438 or Joshua.Adams@Newmont.com or me at 719-851-4048 or Katie.Blake@Newmont.com.
