

TO: Amy Yeldell, Leigh Simmons
FROM: Tim Strack
SUBJECT: American Gypsum – Extension Request
DATE: July 12, 2024

On March 12, 2024 a Multi Person Inspection took place at the Eagle-Gypsum Mine (Mine ID #: M-1984-041) with Amy Yeldell and Leigh Simmons. An inspection report was issued on March 25, 2024, and a corrective action was identified for the operator to submit a Technical Revision to clarify the current approved Mining and Reclamation Plans. The Technical Revision was filed on June 24, 2024, in which there was a review of the material resulting in two (2) Adequacy Reviews in order to address concerns in the Technical Revision. The due date of the Adequacy Reviews is listed as July 15, 2024 and the current decision due date is July 20, 2024.

American Gypsum requests to extend the adequacy review response due date to July 31, 2024, and the decision due date to August 15, 2024.

American Gypsum has hired a consultant to assist with preparation of the Adequacy Review responses. A call took place on 7/10/24 between representatives from American Gypsum, DRMS, BLM, and the consulting firm. Information and data will be collected at the mine site, which will provide adequate support to address the concerns in the Technical Revision. The consultant believes that they will be able to meet the extended deadline of 7/31/24.
