State Line Ranch Aggregate Source SE 1/4, SEC. 13, T. 11 N., R. 80 W.

STATE LINE RANCH AGGREGATE RECLAMATION PLAN MEDICINE BOW-ROUTT NATIONAL FORESTS

REHABILITATION AND MONITORING REQUIREMENTS

ANNUAL:

- Shape the pit floor as shown on the drawings to provide for positive drainage, disperse runoff, and avoid direct sedimentation into adjacent draws.
- 2. Shape cutslopes, fillslopes, embankments, and other areas to minimize erosion.
- 3. Submit an annual fee and report including maps describing acreage affected and reclaimed to date (if there are changes from the previous year). C.R.S. 34-32-116(3)(a).
- 4. Spray noxious weeds that become established within the project area with an approved herbicide.
- Seed topsoil stockpile during first seeding season following each entry with certified noxious weed—free hay seed mix described below.
- 6. Comply with state and federal water quality laws and regulations.

FINAL:

- 1. Replace overburden and waste materials and ensure adequate compaction.
- All backfilling and grading shall be completed as soon as feasible after the mining process.
- Shape and finish cutslopes, fillslopes, embankments, and other areas to be seeded as shown on the drawings, and to blend with the natural contours of the area.
- 4. When necessary, the area shall be scarified or otherwise worked so that the surface is loose to a depth of at least one inch.
- Seed area during the first seeding season following final excavation by spraying or hand broadcasting certified noxious weed-free seed only over all exposed soil on cut and fill slopes.

Seed mix shall be as follows:

Species	Percent of Mix	#PLS/Acre
Western wheatgrass	25	16.0
Bluebunch wheatgrass	25	14.0
Needle-and-thread	25	15.0
Indian ricegrass	25	12.5

- Apply weed and disease free mulch, erosion blankets or sterile weedfree straw/hay for additional soil protection as necessary.
- 7. Comply with state and federal water quality laws and regulations.
