Amber,

Thank you for your kindness it is sincerely appreciated. If we can get an extension on the violations as well that will help us out considerably. Two things are happening:

1. It looks like the mine is going to sell and should be an official item tomorrow afternoon per information given to me.
2. The gentleman that is purchasing the mine has made an agreement with a sub-contractor that will employ a couple of us to do a little work here at the New Elk and a little at the Lorencito site..

When I get more information I will share it with you immediately.

Thank you

Jim Begano
