Reclamation Material Balance (23-24)

Alpine Aggregates' Steamboat Sand and Gravel Pit has made a cut of approximately 1,145,905.47 yards over a surface area of 19.5 acres. A total of 250,628.00 yards of material would be required to restore the current cut to the contours of the approved reclamation plan. The Steamboat Sand and Gravel Pit has 539,470.83 yards of fill stockpiled and 61,282.39 yards of reserve material remaining in the pit's floor which can be utilized as reclamation materials, if necessary. Thus, we have an excess of 434,406.89 yards of available material on site for reclamation. Therefore, there is an adequate volume of material on site to complete reclamation at the current stage of mining.

Sincerely,
ALPINE AGGREGATES, LLC
