

## MEMORANDUM

Date: August 2, 2024  
To: Permit File for Stroh Pit, Permit No. M-2002-078.  
From: Joel Renfro, DRMS  
RE: Stroh Pit (M-2002-078) Objection Notice

---

On August 1, 2024, the Division received an Objection Notice from Chase Bronner. No permitting items are being reviewed for the Stroh, so I called to inquire what this Objection was targeted towards. The following was discussed:

- The objector was informed that there are no active permitting items for the Stroh Pit.
- It was determined based on the conversation that this objection was intended for the Amendment No. 1 (AM-1) application under review for the Kirtright Pit (M-1986-123), which does have an open comment period. The objector submitted objections to other nearby mines operated by Coulson Excavating Company, Inc., including the Stroh Pit.
- The objector did submit an objection for the Kirtright Pit AM-1, which the Division received and recorded on August 1, 2024.
- All objection procedures will proceed through the Kirtright Pit AM-1 review process and no further action will be taken for the Stroh Pit.
