Elliott

The Buckskin Sorted waste will be placed in a specific location within the American Flats repository. This location will be marked on the Annual Report map.

Also, as discussed on the phone, MineWater accepts the Division's additional bond calculation of \$78,000.

Hello Ben,

Can you or MineWater respond to the second part of Item 8? In the event the re-sampling of the sorted TR2 waste material comes back with issues, the Division is wanting the final placement of the material tracked so it can be addressed at that time if needed. I know we discussed on the phone last week that it would be a good idea if the material is placed in a specific/defined portion of the American Flats wasterock stockpile's footprint, but I expanded the comment to include tracking that could be reported on the annual report/map.

Thank you!
