RE: Camp Bird Mine, Permit No. M-1982-090, Technical Revision (TR-8), Adequacy Review-1

Dear Mr. Skerik:

The Division of Reclamation, Mining and Safety (Division) is in the process of reviewing the above referenced Technical Revision in order to ensure that it adequately satisfies the requirements of the Colorado Mined Land Reclamation Act (Act) and the associated Mineral Rules and Regulations of the Colorado Mined Land Reclamation Board for Hard Rock, Metal, and Designated Mining Operations (Rules).

During review of the material submitted, the Division determined that the following issue(s) of concern need to be adequately addressed before the Technical Revision can be considered for approval. Please provide the following:

1. Table 1 "SPLP and ABA Testing Results" included in the application materials is unreadable. Please provide a legible copy of the table. Additionally, it appears that the table does not provide Net Acid Forming Potential vs Net Neutralization Potential for either feed stocks. Please provide a summary table displaying the Net Neutralization Potential vs the Net Acid Forming Potential as well as the analytic sheets provided by the laboratory to corroborate the information.
2. Section 4, Source Material identifies the location of the stockpiles to be removed however does not provide a volumetric estimate of the quantity of material to be removed. Please provide the volumetric quantity of material proposed to be moved under this revision.
3. The included Right of Way Permit for hauling activities has expired. Please provide an updated permit, or documentation from Ouray County stating that no permit is required.
4. Additionally, please provide an estimate of the duration of the export activity. Please note that this is not a firm time frame but an estimate, taking into account seasonal restrictions if they apply.
5. Please provide a clarification as to what each Sample ID correlates to and the location from which that sample was taken. . I.e. "RV ABAB HGW Heads-01", what was sampled, and where was the sample taken.
6. Please Identify all sample locations that were provided for laboratory testing. Specifically identify which piles were sampled, where on the piles were sampled, and what depth of sample was taken.

On June 17, 2024 a separate request (TR-8) was made to import the material from the Camp Bird Mine, at the Revenue Mine, Permit No M-2012-032 that runs concurrent with this revision. Please note that the proposed activities under M-2012-032 TR17 and M-1982-090 TR-8 may not commence until both revisions are approved by the Division and all other necessary agency approvals are obtained.

Please submit your responses to the above listed issues by Monday August 12, 2024 in order to allow the Division sufficient time for review. If you cannot address the above issues by August 12, 2024 please request an extension to the decision due date to ensure adequate time for the Division to review materials. A decision due date of **August 14, 2024** has been set. If any adequacy issues remain by the decision due date and no Decision Date Extension Request has been received, the Division may deny your request.

The Division will continue to review your Technical Revision and will contact you if additional information is needed. If you require additional information, or have questions or concerns, please feel free to contact me.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Lucas West', with a long horizontal flourish extending to the right.
