Clayton,

I am writing to address the adequacy questions raised during the agencies' Q2 review of Stoner Engineering's Q2 Waste Pile/Embankment Inspection. For item number 1, the recommended maintenance for Reach 10 was completed in the three areas highlighted in the report. This work was finalized by the end of July and will continue to be monitored. The maintenance item for Reach 1 (CWD) was completed last week.

Regarding item number 2, the recommended maintenance items for the lower refuse pile were undertaken as part of the ongoing lower refuse pile project. The project has reached its final stages, and a compaction test will be scheduled to be completed, along with the annual compaction test. The results will be shared with the agency upon receipt.

Please feel free to contact me if you require any further information or clarification.

Additionally, please attach michael@summitmining.co in any future emails regarding the King II site.

Michael.
