Denver, CO 80203

RE: Parsons Mine, M-2009-082, Follow-up to inspection dated November 1, 2023

Dear Mr. Bowles:

Please accept this letter as our response for the items in the inspection report dated November 21, 2023:

- 1) CORRECTIVE ACTIONS: The operator shall submit a Technical Revision, with the required \$216 revision fee, to update and clarify the current approved mine plan to reflect existing and proposed activities.

RESPONSE: Martin Marietta would like to extend this date from 8/30/2024 to 10/30/2024 to match Corrective Action #3 so these oil and gas pad removals can be shown on the same maps.

Please accept this letter as our response for the problem cited in a separate letter dated November 29, 2023.

- 3) CORRECTIVE ACTIONS: The Operator shall submit revised Mining and Reclamation Plan maps and revised narrative Exhibits D and E and an updated Exhibit L which reflect the altered reclamation plan in a technical revision.

RESPONSE: With the edition of the Windsor East M-2022-042 material being processed at the Parsons Mine, we are currently reviewing how much additional silt will be generated and which cells will now be filled instead of being left as ponds. Once that is completed, we can revise the maps to show updated plans. Martin Marietta would like to extend this due date from 8/30/2024 to 10/30/2024.

Please let me know if anything additional is needed.

Sincerely,

Julie Mikulas  
Regional Land Manager
