Re: Approval, Reduction of the Analyte List for Surface Water, Effluent, and Groundwater Samples, Technical Revision 15 (TR-15), Cross Gold Mine, Permit No. M-1977-410

Dear Mr. Takami:

On August 27, 2024, the Division of Reclamation, Mining and Safety (Division/DRMS) received your request for Technical Revision No. 15 (TR-15) to reduce the number of analytes surface water, effluent and groundwater samples are sampled for at the Cross Gold Mine, Permit No. M-1977-410.

On September 12, 2024, the Division **approved** TR-15.

Please note the Division may require returning to the original full analyte suite once underground activities resume for a period to evaluate how those activities could be impacting the hydrologic balance.

The terms of Technical Revision No. 15 approved by the Division are hereby incorporated into Permit No. M-1977-410. All other conditions and requirements of Permit No. M-1977-410 remain in full force and effect.

If you need additional information or have any questions, please contact me by email at patrick.lennberg@state.co.us.

Sincerely,

Patrick Lennberg
Environmental Protection Specialist
