RE: Mid-Continent LST, Permit No. M-1982-121, Inspection Problem Abated

Dear Mr. Wagner:

On May 28, 2024 the Division of Reclamation, Mining and Safety (Division) conducted an inspection of the above referenced site. Compliance with Mine Plan was cited as a problem for not having revised the Mine Plan to implement the safety berm prior to construction. Corrective actions required you revise the Mining and Reclamation plan to incorporate this feature by the corrective action date.

On July 31, 2024 the Division approved TR-7 This satisfies the corrective action and it is considered abated.

If you require additional information, or have questions or concerns, please feel free to contact me.

Sincerely,

Amy Yeldell
Environmental Protection Specialist

EC: Travis Marshall, Senior EPS, DRMS
