RE: Roadside Portals Mine, C-1981-041
2nd Quarter 2024 Discharge Monitoring Reports Review

Dear Ms. Hammond,

The Colorado Division of Reclamation, Mining and Safety (the Division) has finished reviewing the 2024 2nd Quarter Discharge Monitoring Reports (DMRs). The reports cover the time period of April 1, 2024 through June 30, 2024. The Division finds the reports to be in compliance with the following Rules:

- **Rule 4.05.13(2)(i)** – Samples are measured accurately and record the quality and quantity of the water discharged from the permit area.
- **Rule 4.05.13(2)(ii)** – There are two outfalls associated with the CO-0027146 NPDES permit, Outfall 002 and Outfall 016. During the months of April, May and June no flow was recorded out of Outfall 002. No exceedances occurred at this location. Outfall 016 discharged during all three months of the 2nd quarter. The reports indicate that no exceedances occurred for the reported parameters during the 2nd quarter. No other concerns were identified during this time period.
- **Rule 4.05.13(2)(iii)** – Discharge Monitoring Reports are received on a quarterly basis and filed with the Division within 90 days of the sample collection. The reports were received on; May 8, 2024 (April report), June 14, 2024 (May report) and July 16, 2024 (June and 2nd quarter reports).

This concludes the Division's review of the 2nd Quarter 2024 Discharge Monitoring Reports for the Roadside Portals Mine. If you have any questions, feel free to contact me at (720)-762-6156.

Sincerely,

Clayton Wein
