Re: Derr Pit, Permit No. M2008017
3rd Qtr. 2024 Groundwater Monitoring Data Acceptance

Dear Mr. Carpenter,

On October 2, 2024, the Division of Reclamation, Mining and Safety (Division/DRMS) received the quarterly groundwater elevation data submitted by J&T Consulting for the Derr Pit.

Per Technical Revision 9, the Operator is required to sample on-site monitoring wells and off-site, privately owned, domestic and irrigation wells, and submit the report to the Division quarterly. If the trigger point of 2 feet of difference for two consecutive months is reached at any of the off-site wells, the Operator will submit a report and mitigation plan to the affected owners and DRMS.

The Division reviewed and accepts the groundwater data volumes submitted for October 2024.

If you have any questions, please contact me at nikie.gagnon@state.co.us or (303) 866-3567 Ext. 8126.

Sincerely,

Nikie Gagnon
