

TO: Amy Yeldell, Leigh Simmons
FROM: Logan Cabi
SUBJECT: American Gypsum – Extension Request
DATE: October 17, 2024

On March 12, 2024 a Multi Person Inspection took place at the Eagle-Gypsum Mine (Mine ID #: M-1984-041) with Amy Yeldell and Leigh Simmons. An inspection report was issued on March 25, 2024, and a corrective action was identified for the operator to submit a Technical Revision to clarify the current approved Mining and Reclamation Plans. The Technical Revision was filed on June 24, 2024, in which there was a review of the material resulting in two (2) Adequacy Reviews in order to address concerns in the Technical Revision. A response was submitted to DRMS on July 31, 2024. On 8/9/2024, a third Adequacy Review was requested due to questions regarding the two previous Adequacy Reviews.

American Gypsum requests to extend the adequacy review response due date to October 18, 2024.

American Gypsum has hired a consultant to assist with preparation of the Adequacy Review responses. Information and data will be collected at the mine site, which will provide adequate support to address the concerns in the Technical Revision. The consultant believes they will be able to meet the extended deadline of 10/18/2024.

Feel free to reach out to me directly at 970-306-3304 or logan.cabi@americangypsum.com.

Thank you,

Logan Cabi
Mine & Environmental Manager
