1313 Sherman Street  
Room 215  
Denver, Colorado 80203

Attn: Amy Yeldell

Please find enclosed updated responses to Adequacy Review #2 and additional clarifications in Adequacy #3. The Technical Revision (TR) includes updated Mining and Reclamation plans (Exhibits D and E) and provides clarification on sequencing of the current permit. Also updated is Exhibit L providing quantities and cost estimates for reclamation of the site in its current condition which has been determined as the worst-case scenario in the current five-year period (2024-2028) in support of calculating a revised financial warranty value for the Eagle-Gypsum Mine, CDRMS Permit M-1984-041, in Eagle County.

This letter is in response to the Minerals Program Inspection Report issued on March 25, 2024, Adequacy Review #2 (July 9, 2024), and subsequent adequacy #3 (August 9, 2024). Pending the clarifications provided within this TR, the Eagle-Gypsum Mine will continue to follow the stipulations outlined in the original approval and subsequently approved Amendments and TRs.

Regards,

Logan Cabi  
Mine & Environmental Manager
