Limon Sand and Gravel Resource 112c Construction Materials Reclamation Permit Application

Mr Hammar:

Please see our adequacy responses in line with your comments. The comments have been addressed in line as well as in the permit documents.

Adequacy comments and responses:

- (a) Item 5.3 requests the operator declare any incidental materials anticipated during the operation. This section is currently blank, however in the mining plan provided the applicant states that fill dirt may be sold as an incidental commodity. Please update the referenced section of the application form to include this information.

This item has been changed to reflect this. See attached revised form.

- (b) Item #9 requests the range and direction of the site to be included, however the applicant has only included the range information. Please check the box indicating the correct direction information.

The direction information has been added to item #9. See attached revised form.

- (c) Item #9 requests the quarter section and quarter quarter section be included, however the applicant has left this information blank. Please resubmit the application form with this information included.

The quarter section and quarter quarter sections have now been included. See attached revised form.

Regards,

Benjamin Miller, PhD.
