RE: Klondike Basin Exploratory Drilling Project, Permit No. P-2022-005, Final Release Request (SL-1), Request for Concurrence

Dear Ms. Wade:

On October 2, 2024 the Division and the Bureau of Land Management (BLM) inspected the above mentioned site. The reclamation of all affected lands was determined adequate however there was some reclamation materials left on site that needed to be removed. The Operator was notified of the required corrective actions in the inspection report and provided photo documentation that the corrective actions have been completed on Friday November 1, 2024.

The Division is recommending **approval** of the release request and, per our memo of understanding prior to sending out approval notifications the Division needs a letter of concurrence from the Bureau of Land Management. Please submit a letter by Monday, November 25, 2024. If no comments are received then the Division will consider the request approved and notify the operator.

If you require additional information, or have questions or concerns, please feel free to contact me.

Sincerely,

Lucas West
Environmental Protection Specialist
