RE: Technical Revision to M-2009-082

Dear Mr. Lennberg:

As a follow-up to the last inspection, it was requested that we submit a technical revision for the following:

- a) Clarify the current approved mine plan to reflect existing and proposed activities with the plugging and abandonment of the oil wells and the removal of the oil and gas pads.
- b) Submit revised Mining and Reclamation Plan maps and revised narrative Exhibit D and E. We are still working on what the final reclamation will look like with the additional wash fines that will be generated from the adjacent permit M-2022-042.
- c) Update Exhibit L to reflect the altered reclamation plan. This is not included. Assuming your recent financial warranty calculations and increase cover this.

Please give me a call (970-407-3631), if additional information is needed.

Sincerely,

A handwritten signature in blue ink that reads 'Julie Mikulas'.
