

Notes:

Please refer to the 2024 Annual Report Map for location of the areas of disturbance in the mine.

El Paso County required ESG to move the main entrance to the Stage IV location in the northeast corner of the permit area (38d48'51.275" N, 104d21'01.455"W). An existing ranch road was used running from Stage I to the new entrance in Stage IV graded. A Haul Route map showing the new entrance and internal road is attached.

4. Mining started at the site in August 2024 after receiving the Local Government approval on 7/31/2024.

8: Stripping started in early August 2024 on 12.3 acres.

15, Growth medium stripped from the active area was placed along the west side of Stage I and along Sanborn Road in the setback area material. We continue to add material to the piles.

16. No seeding of growth medium piles is needed at this time as they remain active.

19. The Bond is currently \$138,200.00. It was last evaluated in April 2021 and allows for up to 40 acres of disturbance.
