

Notes:

Please refer to the 2024 Annual Report Map for location of the areas of disturbance in the mine.

9. We continued to remove material for the mine floor and working face this year. No new area was disturbed. We completed mining in the southwest part of the mine and have begun to backfill and slope the lower part of the mine perimeter in that area.

13. The the reclamation work done by the oil company in July 2021 on and around the drilling pad is growing. It is on it's 4th growing season and appears to be doing well with few weeds growing on the seeded area. No other reclamation is required.

14. Weed control was done in June 2024 in accordance with the Garfield Weed Management Plan for the mine and spot work was done on the Plant Site areas and roadways. The plan calls for using Escort and 2-4-D on the Hoary Crest, and Kochia, Telar and Milestone on the Russian Knapweed. Ranger pro was used on grass areas to control the weeds in those areas. The spraying is successful in controlling the weeds and weed control will continue next year.

18. The bond is currently set at \$22,017 for disturbance on the entire area. This mine was last inspected on 3/29/2021.
