Good Morning Nikie,

I would like to formally request an extension on the due date for the corrective action item identified in the report referenced in the below email as the 'Revegetation' corrective action. As you are aware, we have addressed the 'Signs and Markers' action item. The City has a draft weed control plan and are working on coordination with the local county extension agency (Colorado State University). The City also has a signed contract with Civil Resources to incorporate this weed control plan, and other items identified in the report, through a Technical Revision.

The City is requesting an extension to end of business on December 31, 2024, to allow adequate time for completion of the outstanding corrective action item.

Thank you,

**Scott Olsen****Director of Utilities**

City of Brighton

Hi Scott.

Please see the attached inspection report for the Bromley Lakes mine site. There are two issues cited in the report that require action within the next 30 days, evidence of a mine sign and the submittal of a weed control plan. Since you will be submitting a Technical Revision for the weed control plan, I recommend reviewing the other items called out in the report and updating the reclamation plan map at the same time. The bank stabilization plan can be submitted later when you are ready to install the rip-rap.

Please review the report and reach out to me if you have any questions on how to proceed with the corrective actions.

Kind regards,

-

Nikie Gagnon**Environmental Protection Specialist**
