**RE: Review 2024 Annual Report Permit M2018030**

Good Afternoon,

DRMS has completed reviewing the 2024 annual report for the above referenced permit number. The following questions came up during the review:

In 2019 the affected area comprised 39.5 acres. That changed to 14.4 acres in 2021 and has remained at 14.4 acres since then. However, no documentation such as reclaimed and released acres supports the 25.1 acre change in affected area.

1. Please explain the change in affected area to 14.4 acres and provide supporting documentation.

Please submit the requested information by 20 January 2025.

Should you have questions I'm available to get them resolved.

Sincerely,

Robin Reilley M.S. GISP  
Environmental Protection Specialist II
