RE: M1973007SG, Technical Revision Application for TR-11- Wash Fines Impoundment Capacity Increase

Ms. Ridley,

Holcim is submitting the enclosed design report as Technical Revision #11 (TR11) for the Daniels Sand Facility. The design outlines an increase to the capacity of the current wash fines impoundment that was previously approved by the Division in 2017 under TR05.

The engineered design was completed by GEI on behalf of Holcim, and is attached. Holcim will follow the design as specified in GEI's report during the future construction of this project.

Please let me know if you have any questions during review and we look forward to discussing the design with the Division.

Thank you,
