Fort Morgan, CO. 80701
Morgan County

Annual Report

Morgan Sand & Gravel stripped off the South side of phase 4 the North side of phase 5. Top soil was placed in the Top Soil area , not much overburden was used to level the draw up so we could move to the North side of phase 5.

All of the Class 6 base and Class 7 was stocked piled in the original pit South of phase 1. The Crusher is now set up in phase 4 area. We are crushing Rock so not many stock piles we are hauling rock to office and different jobs. The sand is in a stock pile in the original pit.

If the Spring weather is wet going to reseed around 4-5 Acres Have enough top soil and overburden to level .

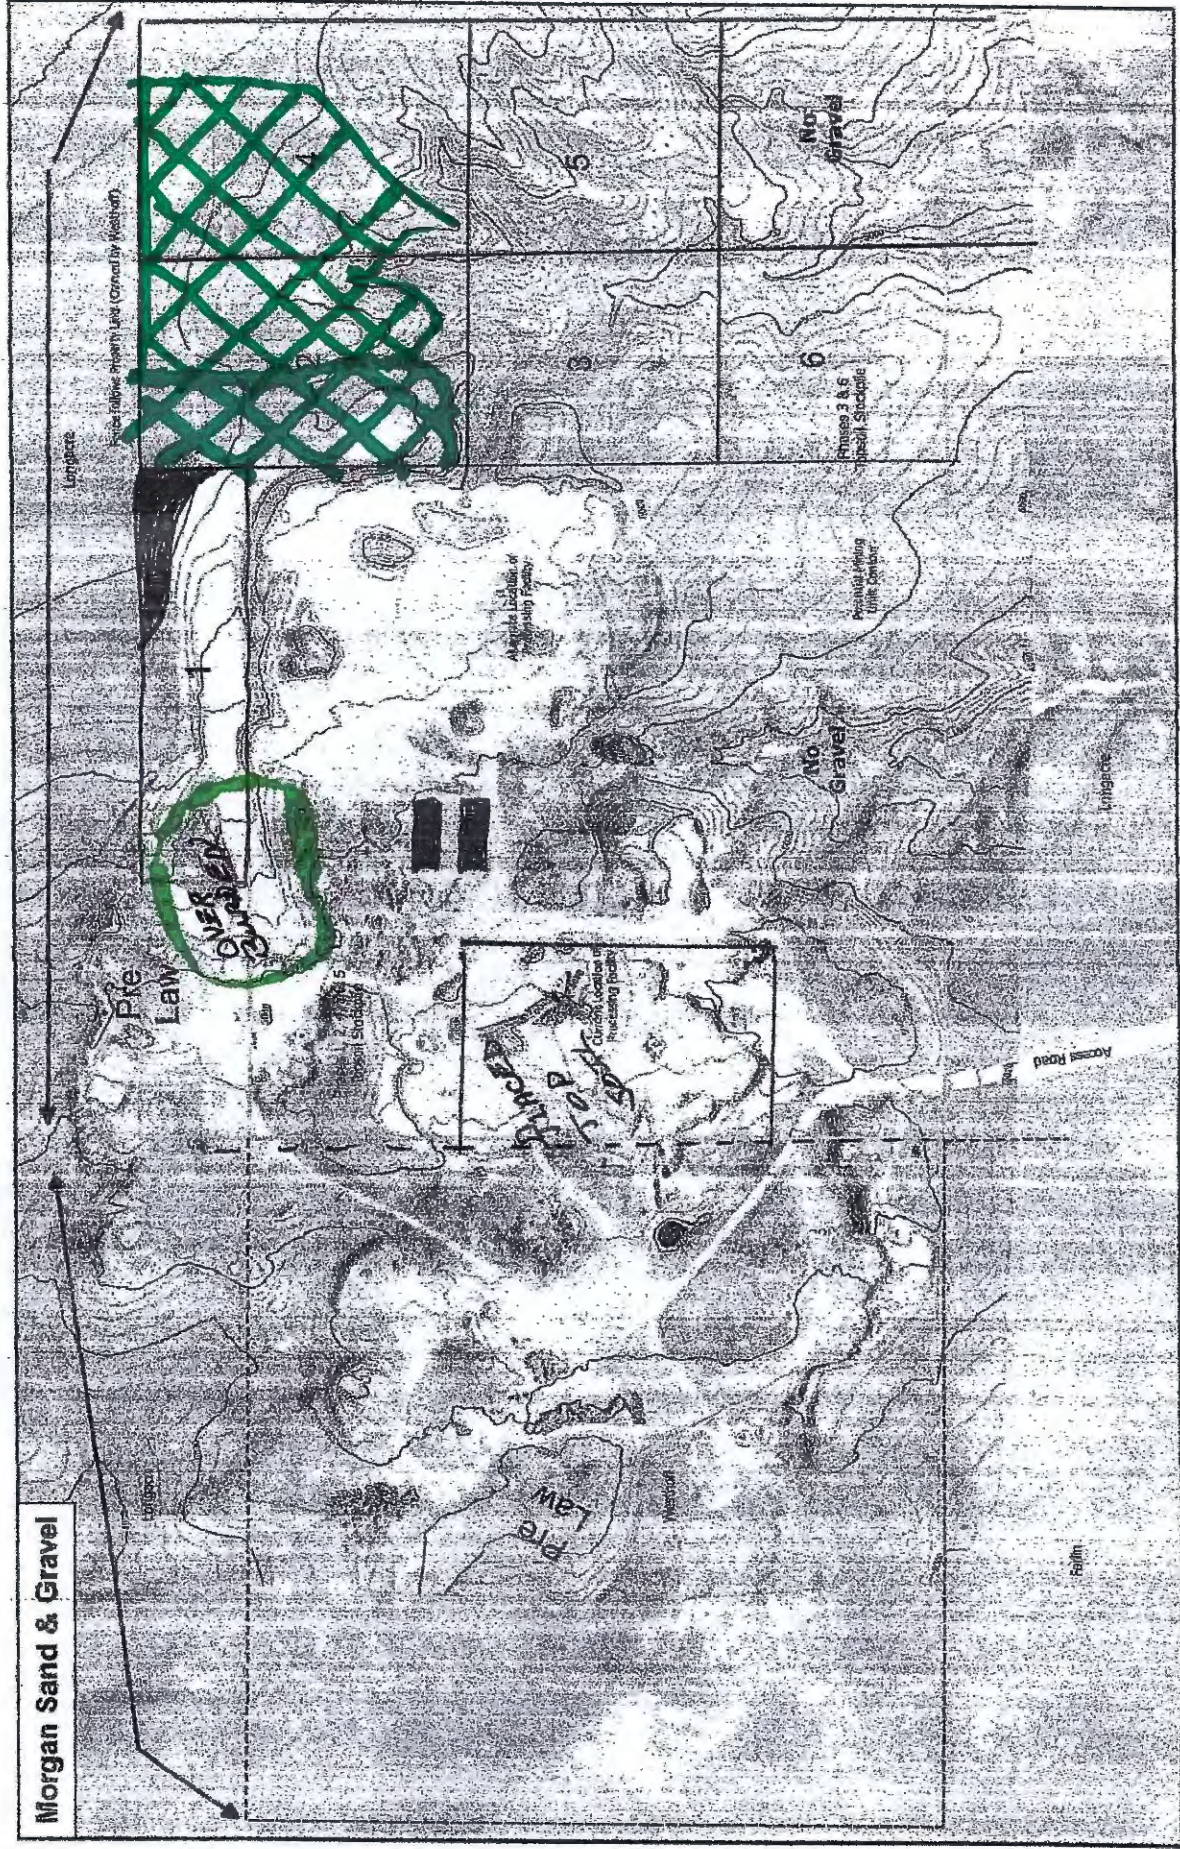

The Green lines on map show what we have mined out to this year.

Respectfully, Morgan Sand & Gravel
