RE: Review 2024 Annual Report Permits M1981085 and M1981086

Good Afternoon,

DRMS has completed reviewing the 2024 annual report for the above referenced permit numbers. The following questions came up during the review:

In 2022 for permit M1981085 the affected area comprised 34.1 acres. The 2023 and 2024 annual reports stated the affected area as 34.1 acres despite having an additional 0.1 acre added as newly affected for each of those years. It appears to DDRMS that the affected area should be increased to 34.3 for the 2024 reporting year. This would be in excess of your stated permit acres.

For permit M1981086 a similar discrepancy exists for the affected area acres stated as 12.8 with additions of 0.1 acres reported. It appears to DDRMS that the affected area should be increased to 13.0 acres for the 2024 reporting year.

1. Please explain the discrepancies in affected areas and provide supporting documentation for both permits.

Please submit the requested information by 23 January 2025.

Should you have questions I'm available to get them resolved.

Sincerely,

Robin Reilley M.S. GISP
