Mr. Matthew Mueller Siloam Stone, Inc. 315 N. 7th St. Canon City, CO 81212

RE: Pinon Mine, File No. M-1997-094, Problem Cited for Inadequate Financial Warranty

On December 5, 2024, the Bedrock Mine #1 was inspected by the Division of Reclamation, Mining and Safety (Division) and a recalculation of the required financial warranty was performed as part of the inspection. The current financial warranty held by the Division is \$8,300.00. Based on the Division's recalculation, the required financial warranty for completing reclamation at the site in accordance with the approved reclamation plan is estimated to be \$21,320.00 (see enclosed reclamation cost estimate). This is considered a problem with required corrective actions, as described below.

INSPECTION TOPIC: Financial Warranty

PROBLEM: The financial warranty is not adequate to reclaim the site in accordance with the approved reclamation plan. This is a failure to maintain the proper financial warranty amount to complete reclamation of the affected lands pursuant to C.R.S. 34-32.5-117(4)(b) and Rule 4.2.1(1). **CORRECTIVE ACTIONS:** The operator shall review the enclosed bond estimate and provide any comments or proof of reclamation completed by the corrective action deadline. Alternatively, the operator may submit a Technical Revision with the associated \$216 fee to revise the reclamation plan (e.g., reduce topsoil replacement depth) and include an updated bond estimate for all remaining reclamation at the site. In this case, the Division will reassess the required financial warranty through its review of the revision. If, by the corrective action deadline, no comments or a Technical Revision have been received, the Division will send a separate surety increase notice to the operator regarding the increase of the financial warranty. The operator will have 60 days from the date on the surety increase notice to post the additional financial warranty. **CORRECTIVE ACTION DUE DATE:** February 13, 2025

Please note, for the Division to consider any comments provided by the operator in its reassessment of the reclamation cost estimate, they should include a description of specific reclamation tasks that have been completed, with these areas identified on a map(s). Any maps provided should include detailed information about the approximate location and acreage of each area where specific reclamation tasks have been completed, approximate volumes of existing overburden and/or topsoil stockpiles, locations and descriptions of the remaining reclamation work, and any other information that would be helpful in calculating the reclamation cost estimate.

January 14, 2025 Mr. Matthew Mueller Siloam Stone, Inc. Page 2 of 2

While the corrective action due date is February 13, 2025, the required items should be submitted to the Division with enough time for review to determine their adequacy in fulfilling the required action.

Please contact me with any questions or concerns about this letter by email at <u>Jocelyn.carter@state.co.us</u> or by phone at (720) 666-1065.

Sincerely,

Jowith the

Jocelyn Carter Environmental Protection Specialist
