RE: M1973007SG, Technical Revision Application for TR-12- Mine Plan Map Revision

Ms. Ridley,

Holcim is submitting the following information as Technical Revision #12 (TR12) for the Daniels Sand Facility. The proposed TR12 requests the revision of the Exhibit C-2 Mine Plan Map from Amendment 3 (2008) of the permit. This revision serves to clarify Holcim's mining activities in the southeastern corner of the permitted area.

Along with the updated map, additional information for this submittal includes a letter provided by Schlage Lock Company LLC (Schlage) from the CDPHE dated October 11, 2024. This letter is in regards to the ongoing Schlage remediation wells within Holcim's facility. The Schlage lock treatment system was introduced to the DRMS under TR-03 in 2001. Holcim has since been working in coordination with Schlage regarding the status of their treatment operations and provides this letter for clarification to as to the approved removal of a portion of Schlage's wells in the area of Holcim's permit.

Enclosed for the Division's approval are the updated Exhibit C-2 Mine Plan Map and clarification letter regarding the status of Schlage's treatment system in the area.

Please let me know if you have any questions during your review.

Thank you,

A handwritten signature in black ink, appearing to read 'Kurt Thurmann'.
