**RE: Permit No. M-2024-012 and M-2022-051, Collett Property, Inspection Problem-Corrective Action
Extension Request Approval-2**

Dear Mr. Abeyta:

On August 7, 2024 the Colorado Division of Reclamation Mining and Safety (Division) inspected the above mentioned pit. Sediment Control and Stormwater Management was cited as a problem. Corrective actions require you to address erosion and rilling on contoured slopes, seeding and weeds. Also, several culverts were not properly constructed. These corrective actions were originally due on October 28, 2024.

On February 19, 2025 the Division received an extension request. Your extension request is approved. Required corrective action documentation:

- Armoring culverts is due by **March 31, 2025**.
- Slope Rilling and revegetation concerns are due by **May 1, 2025**.

If you require additional information, or have questions or concerns, please feel free to contact me.

Sincerely,

Amy Yeldell
Environmental Protection Specialist
