RE: Alamosa Pit No. 2 M1983-175 (Swift Pit)

Mr. Girardi

Per our conversation earlier today, this is a written request to allow the processing of sand at the Swift Pit. The processing of such will generate appropriate material that can then be used to backfill a portion of the site, thus reducing open water. Southway believes that allowing this prior to the Amendment will expediate remediation efforts.

Please let us know if you need additional information to review and approve this request.

Sincerely,

Jodi Schreiber
