## Objection Letters - March 21, 2025, CN-1, Cross Gold Mine, M1977-410

---

**Lennberg - DNR, Patrick** <patrick.lennberg@state.co.us>

Fri, Mar 21, 2025 at 1:56 PM

Draft To: Richard Mittasch <rmittasch@nedmining.com>, Ben Langenfeld <benl@lewicki.biz>

Good Afternoon,

Attached to this email are the Objection Letters the Division has received through the time of writing this email on March 21, 2025. There are thirtyfive (35) letters, most of them are objections. Please note there is a letter of objection from Representative Lesley Smith, HD-49.

Please be prepared to address the topics raised in these letters.

Thank you,  
Patrick

## Permitting Action Comment OR Objection

**COLORADO**  
Division of Reclamation,  
Mining and Safety  
Department of Natural Resources

### CONTACT INFORMATION

You are providing a comment or objection to the public record of a permitting action currently under review by the Division of Reclamation, Mining and Safety. This form is not intended for reporting of possible violations or illegal activity.

Please note that this form is processed through an automated workflow, and forms with incomplete or erroneous permit, permitting action, or county information may be rejected by the automated process.

Comments/objections should pertain to the Rules and Regulations of the Colorado Mined Land Reclamation Board for the Extraction of Construction Materials or Rules and Regulations of the Colorado Mined Land Reclamation Board for Hard Rock, Metal or Designated Mining Operations. Objections and Comments must pertain to issues within the Division's jurisdiction (not pertaining to dust, traffic, noise, hours of operation, affect on property values, local land use decisions, etc.).

Please refer to the Division's [Mining Activity Dashboards](#) to assist you in providing the information required on this form.

You are providing a comment or objection to the public record of a permitting action currently under review by the Division of Reclamation, Mining and Safety. This form is not intended for reporting of possible violations or illegal activity. Please be as specific as possible.

**Comment/Objection Narrative \***

I am a resident and homeowner downstream from the mine applying for a permit change. The expansion by a factor of more than 20 in acreage is a significant concern. The recent failures to submit pollutant reports and noncompliance with discharge permits extending over several years do not inspire confidence in the operator's ability to avoid future pollution incidents. The heavy handed tactics in threatening the town of Nederland with lawsuits while in violation of discharge permits put the operator's priorities in question.

**DESCRIPTION OF COMMENT OR OBJECTION**

You are providing a comment or objection to the public record of a permitting action currently under review by the Division of Reclamation, Mining and Safety. This form is not intended for reporting of possible violations or illegal activity. Please be as specific as possible.

**Comment/Objection Narrative \***

GIR's application for increased mining should be denied based on the past poor practices and potential environmental impacts. I have worked as an environmental engineer at the Summitville mine and have seen first hand the type of environment impacts to the local land and river resources. The idea of a mill using toxic chemicals (like Summitville is a recipe for disaster to surface and drinking water resources; especially as a result of poor stormwater and snow melt runoff. A full public meeting with state agencies needs to be coordinated. CDPHE and the Division of Reclamation, Mining and Safety needs to be held accountable for past violations to water quality and poor water quality permit enforcement.

**DESCRIPTION OF COMMENT OR OBJECTION**

You are providing a comment or objection to the public record of a permitting action currently under review by the Division of Reclamation, Mining and Safety. This form is not intended for reporting of possible violations or illegal activity. Please be as specific as possible.

**Comment/Objection Narrative \***

I object on the grounds that 1) this operation will be a nuisance in both air, sound and dust to the residents in the town of Nederland as the roads leading to the mine are not equipped for heavy industrial trucking, 2) the mine would be located near the school where young people play outside for extended periods, 3) this will likely have negative impacts for our town's air and water quality (our state is already lacking in ozone attainment) and we are usually spared from the dusty air of the front range living at higher altitudes. For these three reasons, please deny any new permits or changes to the existing permit to expand the operation.

**Comment/Objection Narrative \***

I am very concerned about the proposed expansion of the Cross gold mine outside of Nederland. the proposal seeks to expand the operation by an order of magnitude- and given that this mine takes out gold and silver, the possibility for down stream and below ground contamination by heavy metals is enormous. in addition, for visitors to the forest service areas above the mine, access will be impacted as may be safety. I strongly oppose the expansion.

**Comment/Objection Narrative \***

I am a resident of the Town of Nederland. Given the past issues this mine has caused for water quality in Coon and North Beaver Creek, and ultimately the watershed that flows into Barker Reservoir for Nederland and Boulder's drinking water, I am concerned about this massive expansion of the mine. The area above the mine is also a highly trafficked recreation area for jeeping, dirt biking, gravel biking, hiking, backcountry skiing, and wildflower viewing for residents and local tourists along the 505. This would no longer be possible with the mine's expansion. I would be amenable to perhaps a graduated/stepped increase from the current 10 acres.

## Permitting Action Comment OR Objection

**COLORADO**  
Division of Reclamation,  
Mining and Safety  
Department of Natural Resources

### CONTACT INFORMATION

You are providing a comment or objection to the public record of a permitting action currently under review by the Division of Reclamation, Mining and Safety. This form is not intended for reporting of possible violations or illegal activity.

Please note that this form is processed through an automated workflow, and forms with incomplete or erroneous permit, permitting action, or county information may be rejected by the automated process.

Comments/objections should pertain to the Rules and Regulations of the Colorado Mined Land Reclamation Board for the Extraction of Construction Materials or Rules and Regulations of the Colorado Mined Land Reclamation Board for Hard Rock, Metal or Designated Mining Operations. Objections and Comments must pertain to issues within the Division's jurisdiction (not pertaining to dust, traffic, noise, hours of operation, affect on property values, local land use decisions, etc.).

Please refer to the Division's [Mining Activity Dashboards](#) to assist you in providing the information required on this form.

#### Date of Comment or Objection

**Comment/Objection Narrative \***

I'm very concerned about the possible disastrous effects on the water supply in surrounding areas of Boulder County and the potential for further pollution, especially considering past issues with heavy metals leaking into the water source. This company has a significant history of water pollution in the past, why would we chance it?

**Comment/Objection Narrative \***

If drinking water has not been kept safe in the past (see violations) then expansion should not be considered, given the large number of residents relying on water from the source that has, in the past, been contaminated by operations at this mine.

**DESCRIPTION OF COMMENT OR OBJECTION**

You are providing a comment or objection to the public record of a permitting action currently under review by the Division of Reclamation, Mining and Safety. This form is not intended for reporting of possible violations or illegal activity. Please be as specific as possible.

**Comment/Objection Narrative \***

I object to the duration and geographic extent of this permit request. No agency can predict circumstances for fifty years into the future; the duration of this request is unreasonable. The expansion of the area in question seems excessive given past performance of the operator and changes dramatically the nature of waste management required to comply with contamination limits; the requestor has not demonstrated they can manage waste contamination from underground mining. I am affected to the extent that I rely on City of Boulder professional services who use water in treatments.

**Comment/Objection Narrative \***

Please do not allow any further mining activity to occur at the Cross mine located outside of Nederland. Any contamination from the mine could destroy neighboring land and contaminate the nearby reservoir which is a drinking water source for the city of Boulder. The mine has already had multiple violations and a cease and desist order. We need to protect the sensitive environment by not allowing any further activity to occur at this mine. Do not grant any permits.

Thank you.

**Comment/Objection Narrative \***

I am a resident of Nederland CO writing to expression opposition to the expansion of Cross Gold Mine to over 200 acres. The company that owns the mine has a history of disregard for both the local community and the environment, and should not be expanding its mining efforts in such an ecologically sensitive location. Please reject the efforts of Cross Gold Mine to expand.

**DESCRIPTION OF COMMENT OR OBJECTION**

You are providing a comment or objection to the public record of a permitting action currently under review by the Division of Reclamation, Mining and Safety. This form is not intended for reporting of possible violations or illegal activity. Please be as specific as possible.

**Comment/Objection Narrative \***

I oppose approval of the enlargement of this mine because:

\* the track record of the past operations for this mine is not up to our State standards

\* there is not adequate evidence that the operation of a larger mine will be better

\* the mine is in the watershed that provides drinking water for me and other Boulder residents, so we cannot and should not make a mistake in allowing any contaminants for the sake of the health of those drinking this water.

I would like to express my concern/objection to the proposed expansion of the operations at the Cross Gold Mine from 9.99 acres to 205.7 acres, an increase of 195.71 acres. I am particularly concerned about the potential impacts to the water quality and increase in traffic near our home on County Road 126 S., Nederland, CO, resulting from the proposed expansion.

I am concerned for my health and my family's health that this permit would allow the mine operator to add heavy metals to our water supply at Barker Reservoir. Therefore, it should not be allowed to be re-opened or expanded operations.

This mine has a history of violations. The mine was issued a cease-and-desist order from DRMS in 2022 in response to excessive traces of lead and copper found in the watershed from December 2020 to August 2021

**Comment/Objection Narrative \***

I have no objection to the existing permit but the revision to a DMO includes a significant expansion in operations increasing the permit area from 9.99 acres to 205.7 acres. There does not appear to be any supporting documentation to describe the scope and nature of this expansion. Clearly an expanded operation could include potential environmental impacts to groundwater. Our property relies upon an established well. Likewise an expanded operation will increase truck traffic on Caribou Road and potentially diversion through CR 128 which transverses our 10 acre property. I have serious objections to this expansion especially considering the lack of transparency in trying to slip that into the basic conversion to a DMO. That seems neither appropriate or ethical to attempt to include expansion plans without full disclosure of the impacts.

**DESCRIPTION OF COMMENT OR OBJECTION**

You are providing a comment or objection to the public record of a permitting action currently under review by the Division of Reclamation, Mining and Safety. This form is not intended for reporting of possible violations or illegal activity. Please be as specific as possible.

**Comment/Objection Narrative \***

I'm very concerned about the possibility of increased and new mining near the reservoir that provides my city's water. Pure drinking water and safe water for cooking is something I greatly value and have always appreciated having in Boulder. I live in Boulder and actually grew up in Boulder. One of my favorite things to do with out of town guests is to take them up to the beautiful town of Nederland. Please do not allow the new permit for expanded mining operations that could easily not only ruin the natural beauty of this area, but also potentially leach harmful heavy metals into our drinking water. From what I've read, the particular company that is applying for this permit has a history of leaching heavy metals from its operations. We need to protect our citizens and nature now more than ever. Thank you.

**Comment/Objection Narrative \***

I believe that the GIR llc members do not have the knowledge, ability, or desire to protect the water from contamination, air pollution, & general destruction of the environment. My father owned this gold mine for 50 years. Taking very good care of the land & water resources. I'm concerned that IN MY OPINION these men only care about money & will do whatever it takes to fill their pockets. No matter the environmental repercussions.

**Comment/Objection Narrative \***

As the elected representative of HD49 of Nederland and the western flank of the city of Boulder, I have strong concerns about the potential expansion of mining operations of the Cross gold mine, owned by Grand Island Resources (GIR). I believe this expansion merits thorough scrutiny, and I ask for a public hearing. My professional background is a PhD limnologist, and I served on the city of Boulder's Water Resources Advisory Board. I also was a research scientist at CU Boulder and taught and conducted research at CU's Mountain Research Station, located close to Caribou. I'm well versed in the deleterious effects of acid mine drainage, and I have grave concerns about the potential effects of expanding mining operations by GIR, who has had multiple violations of state of discharge permits and a cease and desist order in 2021. The permit request requires more scrutiny in a public setting. I, along with several other elected officials representing Boulder and Boulder County have a recently published Op-Ed expressing concern about potential water quality effects of expanded mining operations <https://www.dailycamera.com/2025/03/16/guest-opinion-lesley-smith-possible-expansion-of-mining-operations-in-boulder-county-raise-concerns/>

**DESCRIPTION OF COMMENT OR OBJECTION**

You are providing a comment or objection to the public record of a permitting action currently under review by the Division of Reclamation, Mining and Safety. This form is not intended for reporting of possible violations or illegal activity. Please be as specific as possible.

**Comment/Objection Narrative \***

I own property on E 1st St in Nederland, CO which border middle Boulder Creek. Although I now live along North Boulder Creek north of Nederland, I had a home with a well on Caribou road and have hiked Hicks Creek many times. Drainage from the Cross Mine flows through Nederland and enters Barker which is part of the City of Boulder water supply.

The new proposal by Grand Island resources to re-open and expand the Cross mine will expose fresh mine waste (tailings) to weathering and runoff containing lead, copper, arsenic and zinc. Exposure to these toxic heavy metals should not be increased for the well owners along Caribou road or for those dependent upon the Barker water supply. The Cross Mine lies within and adjacent to the Indian Peaks wilderness. Heavy recreational use ending at the top of Caribou Road will be adversely affect by expansion of this mine. As a geologist I have previously worked on the tailings at Fremont Pass (AMAX.) No DMO should be granted to Grand Island Resources without a detailed geochemical analysis of the hydrological impacts from dumping fresh tailings at the head of this watershed. GIR claims of being able to safely monitor and filter this runoff are unsubstantiated. If GIR finds less profitable ore at the Cross Mine how will a water treatment plant be operated and by whom and for how long once the tailings are exposed at high altitude just below tree line? Just as for the AMAX tailings at Fremont Pass, almost no revegetation is possible at this altitude and will require the financial resources for water treatment and monitoring for generations to come. MLRB needs to engage with the Nederland community before any permits are issued to GIR.

**DESCRIPTION OF COMMENT OR OBJECTION**

You are providing a comment or objection to the public record of a permitting action currently under review by the Division of Reclamation, Mining and Safety. This form is not intended for reporting of possible violations or illegal activity. Please be as specific as possible.

**Comment/Objection Narrative \***

As a concerned Boulder resident, I am firmly opposed to the reopening of the Caribou and Cross Mines due to the serious environmental and public health risks they present. In the past, these mines have released heavy metals such as lead and cadmium into local waterways, endangering water quality and harming aquatic ecosystems.

Despite previous cease-and-desist orders and fines, contamination issues remain unresolved. Moving forward with mining operations without thorough and effective remediation plans puts our community's drinking water and the surrounding environment at risk.

Given the ongoing struggle to control acid mine drainage throughout Colorado, it is essential to prioritize the safety and well-being of Nederland residents by preventing the return of mining activities that have a history of causing environmental damage.

**DESCRIPTION OF COMMENT OR OBJECTION**

You are providing a comment or objection to the public record of a permitting action currently under review by the Division of Reclamation, Mining and Safety. This form is not intended for reporting of possible violations or illegal activity. Please be as specific as possible.

**Comment/Objection Narrative \***

I am opposed to any expansion of the Caribou Cross mine. I live right off Caribou Rd and ride my bike up to the top frequently in the summer and ski up there in the winter. I see the impact of the increase activity at the mine already, since the new ownership. They have not been as good of neighbors as they have said they will be. There is an increase in truck traffic from the mine, often times speeding past me while I am riding my bike. There is an increase in dust and air pollution at my house.

Additionally, at a meeting a few years ago with the mine operators and their lawyer, they assured us they were not trying to close our access to recreation on our public lands. Yet now we find many no trespassing signs and orange fencing in places that historically have been access points to Nation Forest land. I have been using these trails for nearly 20 years, and they have been there for a lot longer than that.

I have concern about the condition of Caribou Rd above the mine's entrance, it appears to be collapsing, I've also witnessed them spraying something into the mine shaft in that area that has over sprayed into the trees. Not sure what it is though. I've also seen the creek in my back yard turn yellow at times, and would like increased water monitoring.

Lastly, I would request a traffic survey done about the increase in traffic that will impact our neighborhood down below the mine on Caribou. I can only imagine that is will be proportionate to the increase in size of what they are asking. Is Caribou Rd even engineered and designed to handle the increase in size, weight and volume of traffic that will come with this expansion?

I'm very concerned about Permit M1977410 -the potential expansion of mining operations by the Cross gold mine. This mine has a history of violations. I'm concerned about the potential impacts this expansion could have on well water up-canyon from Boulder, surface water in Barker Reservoir and drinking water quality in the city of Boulder as well as the impact to wildlife.

**Comment/Objection Narrative \***

I'm a cancer survivor poisoned by polluted well water and it cost me over \$150,000 of my own money after insurance to survive cancer that was caused by foreign chemicals (PFAS) being dumped into the water aquifer. My only option has been to pay off the medical debt with a HELOC tied to my house. I'm grateful that I own property in Boulder County and that I had this option, as many don't. Please don't let this happen to anyone else in Boulder County. I survived but it has ruined my financial life and my physical health. Due to this happening, I will never be able to afford to retire and I definitely have a slim chance of being able to afford to even stay in my beloved state (Colorado) when I retire, because of how it has crushed me financially. PLEASE don't allow more mining in that area.

You are providing a comment or objection to the public record of a permitting action currently under review by the Division of Reclamation, Mining and Safety. This form is not intended for reporting of possible violations or illegal activity. Please be as specific as possible.

**Comment/Objection Narrative \***

This mine sits above water resources that are critical for tens of thousands of residents on the front range. I believe it would be incredibly short sighted to put the health and safety of those residents at risk for the benefit of a single small mine operator.

### CONTACT INFORMATION

You are providing a comment or objection to the public record of a permitting action currently under review by the Division of Reclamation, Mining and Safety. This form is not intended for reporting of possible violations or illegal activity.

Please note that this form is processed through an automated workflow, and forms with incomplete or erroneous permit, permitting action, or county information may be rejected by the automated process.

Comments/objections should pertain to the Rules and Regulations of the Colorado Mined Land Reclamation Board for the Extraction of Construction Materials or Rules and Regulations of the Colorado Mined Land Reclamation Board for Hard Rock, Metal or Designated Mining Operations. Objections and Comments must pertain to issues within the Division's jurisdiction (not pertaining to dust, traffic, noise, hours of operation, affect on property values, local land use decisions, etc.).

Please refer to the Division's [Mining Activity Dashboards](#) to assist you in providing the information required on this form.

**Comment/Objection Narrative \***

The major expansion of Cross Mine under Permit M1977410 could easily lead to the hazard of putting heavy metals into the Boulder water supply. The mine has a history of violations of its discharge permit even under its smaller historical operations. Storage of extraction chemicals was not included in the permit request.

**Comment/Objection Narrative \***

At a time when the US needs every ton of metal it can possibly produce, this mine permit is absolutely needed. The operators are incredibly conscientious regarding environmental matters. I strongly support their application.

**Comment/Objection Narrative \***

My questions are:

What are you planning on mining? Minerals? Which ones? Hard Rock?

How many pounds will you load into each truck? How many trucks per day maximum?

Is there a possibility of mining anything else? Uranium? Others stuff? Is there an agreement to limit you to the list of things you will take from the existing Cross Gold Mine or other mines you might drill?

Are you required to clean up the toxic mess left by previous owner/operators of this property before commencing your new operation?

I know mining techniques have changed and improved in safety and efficiency. Can you list these changes and their impacts?

What are the environmental impacts of your new improvements?

What reassurance does our community have that you will not poison us, our land and our water?

Thank you for responding. I look forward to reading and sharing your answers.
