Division of Reclamation, Mining and Safety  
1313 Sherman St. Room 215  
Denver, Co 80203

Regarding: Annual Report

Permittee: Ephemeral Resources, LLC  
Permit: M-2002-046  
Operation Name: D Road Gravel Pit  
Anniversary Date: April 14, 2023

The above-mentioned pit location was in operation more than 180 days and has not been granted a temporary cessation during the past year.

During the past year extraction in Area E was completed as shown on the attached map. Operations and stockpiles in Areas A and D remain in use and are shown on the attached map. Area C remains unaffected; however extraction is expected to start in late 2025 or the spring of 2026.

Seeding in Area B was completed in the fall of 2015 and weed control is ongoing.

Weed control continues from April thru August. Weed control was done by the lessee. Primarily 2-4-D and curtail are used to control mostly Kosha weeds and some Russian Knapweed as well as mowing operations.

During the past year we estimate that 50,000 tons of inert fill was imported into Extraction Area E and will be used for reclamation.

Attached is a map of the pit showing the extraction areas, sloping and stockpile locations.
