**SUPPLEMENTAL INFORMATION** (as of 3/17/2025)

10. The entire 59.7 ac. permit area, with the exception of the access roads, have been resoiled and graded. Reclamation is complete and we continue to monitor success and will do any remedial reseeding or grading as needed.
12. Inert Fill Area and Former Plant Site (59.7 ac.) was seeded with the approved seed mix in the fall of 2023. The grass is growing and may need some inter-seeding this year once the growing season begins and that can be determined.
19. The bond was revaluated in December 2023 and is adequate to reclaim the disturbed area.
