Hunter,

This technical revision request is due to the on- going grass establishment problem we are having at the Peroulis Snake River Pit. It has been seeded over the past 5 years 4 times. The last time with a no till grass drill. Grass came in nicely, but then died out due to sandy soil and dry conditions. Then competition with weeds became a problem.

Frontier station has recommended a seed mix that we hope will get grass coverage established and grow better in the high desert area. We will till weeds first , plant, temp fence and monitor.

Thank you,
