Hi Leigh,

See attached updates to our application incorporating responses to the adequacy review. I updated the individual sections and attached them separately to this email.

I am still working on the updated maps by a registered land surveyor or professional engineer.

Regarding Rule 6.2(12) Exhibit L - Permanent Man-Made Structures, Virginia Canyon Rd access. I have requested a notarized letter from the Gilpin County Community Development office on several occasions and have been unable to get a response on this item. What I do have is our issued/approved Driveway Permit (attached and in original application), our permit application was reviewed and approved by both the County Community Development Director and Public Works office, which included our updated survey. As this is a county road, it is not privately owned. Please advise how you'd like me to proceed here.

Given we're fast approaching the current decision date of April 4th, I'd like to request an extension for the decision on our application to April 18th, 2025. Provided this is enough time for you to review and respond accordingly.
