Hi Jocelyn,

I am not sure we are going to hit the due date for the fuel leak. We excavated the soil under the fuel leak and barreled it up for disposal, however we have not received results yet from the lab on whether we removed enough material yet. Once we receive those results we will properly dispose of everything and provide lab results and evidence of proper disposal. Is there anything formal I should submit to request an extension? Progress pictures attached...

Thanks,

Tim
