**Re: Additional Information Required, Annual Groundwater Level Data for 2024-2025,
Riverbend Operation, Permit No. M-2000-016**

Dear Ms. Mikulas:

On March 26, 2025, the Division of Reclamation, Mining and Safety (Division/DRMS) received your Annual Groundwater Level Data for 2024-2025 from the Riverbend Operation. After review of the submission the Division has additional items that need to be addressed or clarified.

1. Please provide a monitoring well location map that shows the locations of all the monitoring wells relative to the permit boundary.
2. Please provide a line graph that shows the water levels for all monitoring wells since March 2023.
3. Please provide an explanation of the large fluctuations (3 feet or greater) in water levels that appear in wells from one month to the next.
4. In CH-MW01 it appears that the water level in this well has been rising, getting closer to the surface, over time and was within 2-feet of the surface in June 2024. Please provide an explanation of this possible trend and if it is related to mining activities at the site.

Please respond to these items by **May 9, 2025**. The Division reserves the right to further supplement this document with additional items and details as necessary.

If you need additional information or have any questions, please contact me by email at patrick.lennberg@state.co.us.

Sincerely,

Patrick Lennberg
Environmental Protection Specialist
