RE: Adequacy Review No. 1; Technical Revision No. 2 (TR-2) – Design Drawings for Reservoir Liner; Windsor East Mine, Permit No. M-2022-042

Dear Ms. Mikulas:

On March 27, 2025, the Division of Reclamation, Mining and Safety (Division/DRMS) received your request for Technical Revision No. 2 (TR-2) submittal of reservoir liner design drawings to satisfy a commitment made during the original permitting process at the Windsor East Mine, Permit No. M-2022-042. The following clarifications or items need to be addressed to the Division's satisfaction.

1. Pursuant to Rule 6.2.1(2) the maps need to be updated with the following item, the name of the applicant needs to be added. The maps also reference the Great Western Mine. The name needs to be updated, on both maps, to correctly identify the site as the Windsor East Mine and include the correct permit number. Additionally, the permit boundary needs to be labeled on each map. Please update and resubmit the maps.

This concludes the Division's adequacy review of your application. The Division reserves the right to further supplement this document with additional adequacy items and/or details as necessary.

The decision date for your application is set for **April 26, 2025**. If additional time is needed to respond, an extension request must be received by our Office by the decision date. If on the decision date, outstanding adequacy items remain, and no extension request has been received, your revision may be denied and the file terminated.

If you need additional information, please contact me by email at patrick.lennberg@state.co.us.

Sincerely,

Patrick Lennberg
Environmental Protection Specialist
